Table of contents

Originals

Agrafiotis, G.: see Tsakiris, G. 51

Arnell, N.W.: Unbiased estimation of flood risk with the GEV distribution 201

Ashkar, F; Bobee, B.; Leroux, D.; Morissette, D: The generalized method of moments as applied to the generalized gamma distribution 161

Bobee, B.: see Ashkar, F. 161

Damsleth, E.; El-Shaarawi, A.H.: Estimation of autocorrelation in a binary time series 61

Durgunoglu, A: see Rao, A.R. 35

El-Shaarawi, A.H.: see Damsleth, E. 61

Heemink, A.W.: Practical aspects of stochastic dynamic tidal modelling 137

Hromadka II, T.V.; Whitley, R.J.: The design storm concept in flood control design and planning 213

Jakubowski, W.: A daily rainfall occurrence process 1

Karlinger, M.R.: see Troutman, B.M. 73

Kavvas, M.L.; Puri, P.S.; Saquib, M.N.: Analytical extensions of the stochastic description of cyclonic precipitation fields in time and space 263

Kavvas, M.L.: see Saquib, M.N. 281

Kiountouzis, E.: see Tsakiris, G. 51

Laborde, J.P.: see Lebel, Th. 245

Lebel, Th.; Laborde, J.P.: A geostatistical approach for areal rainfall statistics assessment 245

Leroux, D.: see Ashkar, F. 161

Lloyd, E.H.; Warren, D.: The historically adjusted range and the historically readjusted range 175

Loaiciga, H.A.; Shumway, R.H.; Yeh, W.W.-G.: Linear spatial interpolation: analysis with an application to San Joaquin Valley 113

Mekis, E.: see Szöllősi-Nagy, A. 17

Morissette, D.: see Ashkar, F. 161

Najem, W.: A continous point process model for daily rainfall 189

Privalsky, V. E.: Modeling long term lake variations by physically based stochastic dynamic models 303

Puri, P.S.: see Kavvas, M.L. 263

Puri, P.S.: see Saquib, M.N. 281

Rao, A.R.; Durgunoglu, A.: AR and ARMA spectral estimation 35

Saquib, M.N.; Kavvas, M.L.; Puri, P.S.: Simulation of time-space evolution of an extra-tropical cyclonic precipitation field over U.S.A. 281

Saquib, M.N.: see Kavvas, M.L. 263

Serrano, S.E.: General solution to random advective-dispersive equation in porous media. Part I: stochasticity in the sources and in the boundaries 79

Serrano, S.E.: General solution to random advective-dispersive equation in porous media. Part I: stochasticity in the parameters 99

Shumway, R.H.: see Loaiciga, H.A. 113

Souza, R.C.: see Valdares-Tavares 295

Szöllősi-Nagy, A; Mekis, E.: Comparative analysis of three recursive real-time river flow forecasting models: deterministic, stochastic and coupled deterministic-stochastic 17

Troutman, B.M.; Karlinger, M.R.: Asymptotic Rayleigh instantaneous unit hydrograph 73

Tsakiris, G.; Agrafiotis, G.; Kiountouzis, E.: A short noise model for the generation of soil moisture data 51

Valdares-Tavares, L.; Souza, R.C.: A multiple distribution Markovian model for annual hydrologic time series 295

Warren, D.: see Lloyd, E.H. 175

Whitley, R.J.: see Hromadka II, T.V. 213

Yeh, W.W.-G.: see Loaiciga, H.A. 113

Technical notes

Arora, K; Singh, V.P.: On the method of maximum likelihood estimation for Log-Pearson type 3 distribution 155

Easley, D.H.; Tung, Y.-K.: Evaluation of flow probabilities in run-off detention ponds 239

Hromadka II, T.V.: see Whitley, R.J. 151

Singh, V.P.: see Arora, K. 155

Tung, Y.-K.: see Easley, D.H. 239

Whitley, R.J.; Hromadka II, T.V.: Confidence intervals for flood control design 151
